What is WWW2.SAVEMAX.STORE?

WWW2.SAVEMAX.STORE is a Browser Hijacker! WWW2.SAVEMAX.STORE is classified as PUP.Adware.SAVEMAX.STORE. Browser Hijacker is a VIRUS, that alters your computer's browser settings and redirects you to websites that you had no intention of visiting. WWW2.SAVEMAX.STORE browser hijacker may replace the existing home page, error page, or search page with its own.

How did I get infected by WWW2.SAVEMAX.STORE virus?

My browser began to redirect me at WWW2.SAVEMAX.STORE and showed me **ads**. In my case, all **shortcuts** of my browsers were **infected** and changed. My homepage were changed to WWW2.SAVEMAX.STORE too. I have tried to change it, I have checked all settings of my browser, but in waste - after a couple of minutes it has returned to WWW2.SAVEMAX.STORE.

[Download Removal Tool here...](#)

I have checked the **scheduled task** and deleted them. That was not enough too.

I have checked and closed all **suspicious processes**, and started to fix my shortcuts again. The same thing - all settings has returned to WWW2.SAVEMAX.STORE. I have checked all programs in autostart menu...

So I have spend about 2 hours to fix that problem manually!

You can save 2 hours using this manual!

Follow instructions step by step.

You have 2 ways to remove WWW2.SAVEMAX.STORE:

1. Remove Automatically.

2. Remove Manually.

Why I recommend you to use an automatic way?

1. You know only one virus name: "WWW2.SAVEMAX.STORE", but usually you have infected by a bunch of viruses.
The UnHackMe program detects this threat and all others.
2. UnHackMe is quite fast! You need only 5 minutes to check your PC.
3. UnHackMe uses the special features to remove hard in removal viruses. If you remove a virus manually, it can prevent deleting using a self-protecting module. If you even delete the virus, it may recreate himself by a stealthy module.
4. UnHackMe is small and compatible with any antivirus.
5. UnHackMe is fully free for 30-days!

How to easily remove WWW2.SAVEMAX.STORE

virus? (Virus removal guide)

Here's how to remove
WWW2.SAVEMAX.STORE virus:

[**STEP 1: Install UnHackMe. \(1 minute\)**](#)

[**STEP 2: Scan for WWW2.SAVEMAX.STORE malware using UnHackMe. \(1 minute\)**](#)

[**STEP 3: Remove WWW2.SAVEMAX.STORE malware. \(3 minutes\)**](#)

[**STEP 4: \(optional\) Clear your basket and cache.**](#)

[**UnHackMe**](#) will complete all steps I wrote above by checking all items with it's database in only 1 minute! Also [**UnHackMe**](#) surely will find another malware too, not only WWW2.SAVEMAX.STORE virus. With manual deletion there can be some problems with erasing some opened files. Some processes can immediately be opened again. Often you can not have access rights to do some operations also. [**UnHackMe**](#) ready to all this situations and will make hard work during reboot. And that is not the end! If after erasing WWW2.SAVEMAX.STORE virus some problems still exists, [**UnHackMe**](#) has manual mode to explore unwanted programs in list and fix them. Just try to use [**UnHackMe**](#) from [**Greatis Software**](#) and follow this guide!

So let's start now:

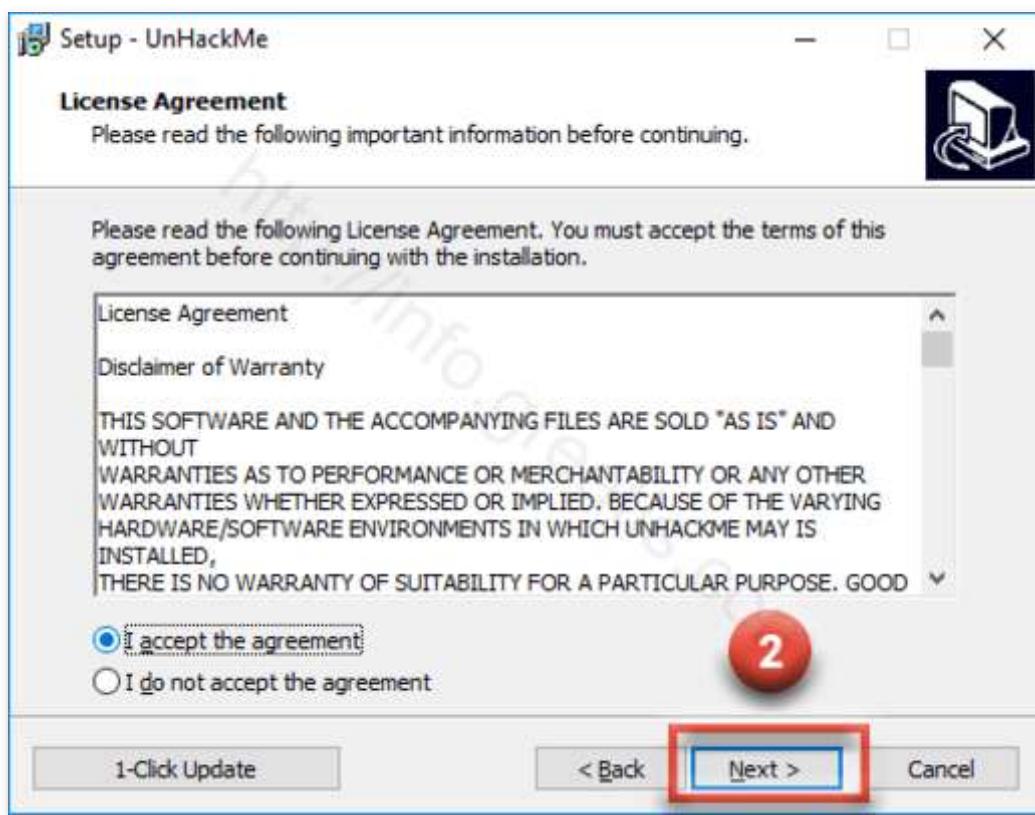

STEP 1: Install UnHackMe (1 minute).

1. [**Download UnHackMe from official web site.**](#) Double click on UnHackMe.zip. Choose 'unhackme_setup.exe'.

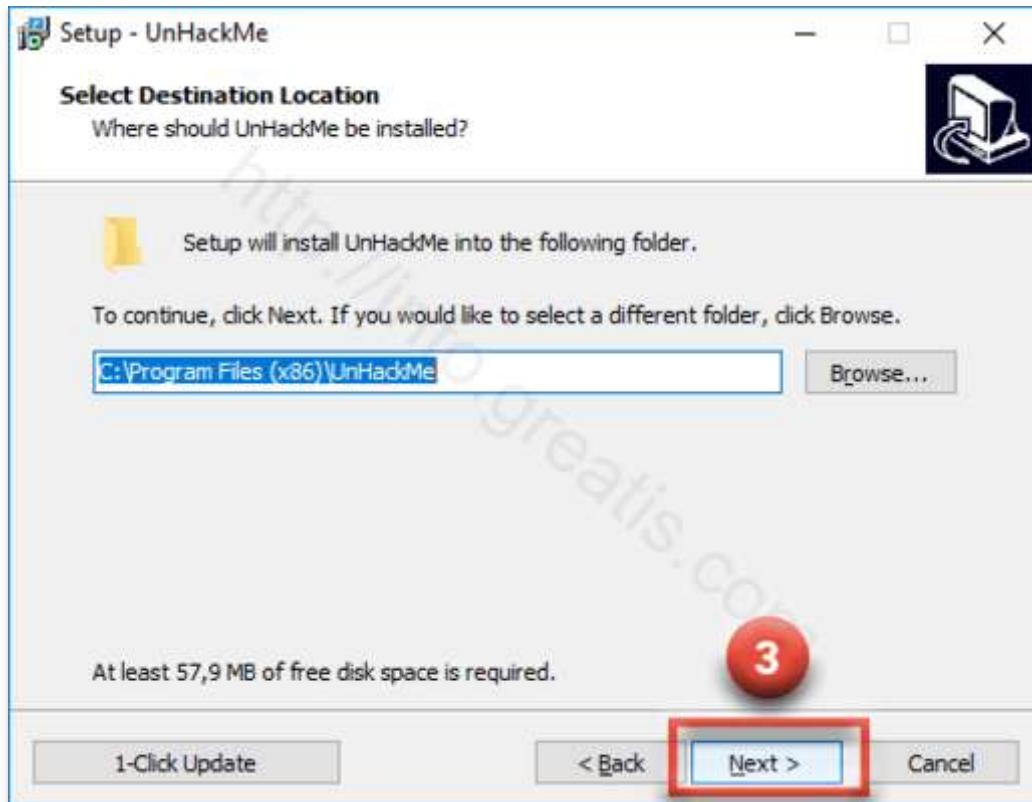

2. Then you have to accept the license agreement.

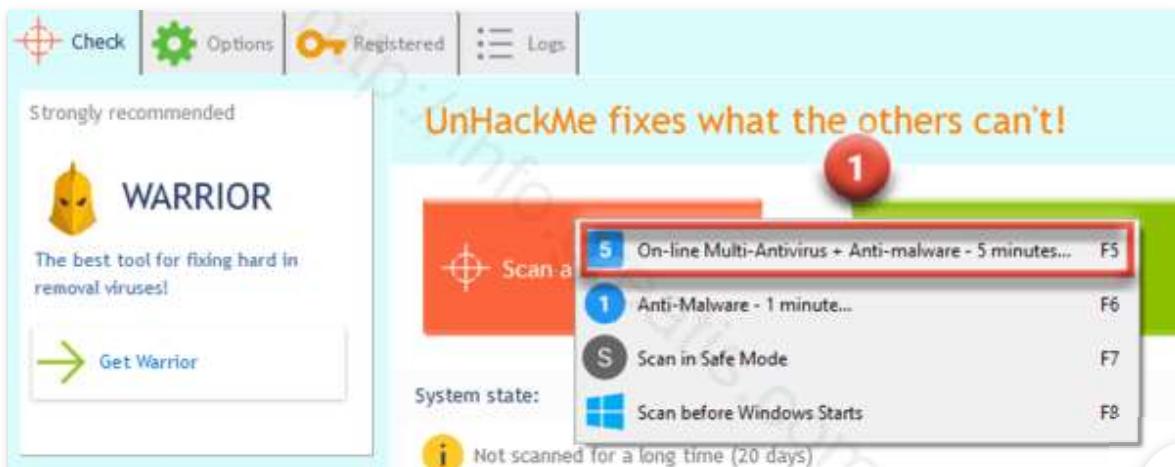

3. And later you have to choose destination to install and finish installation process.

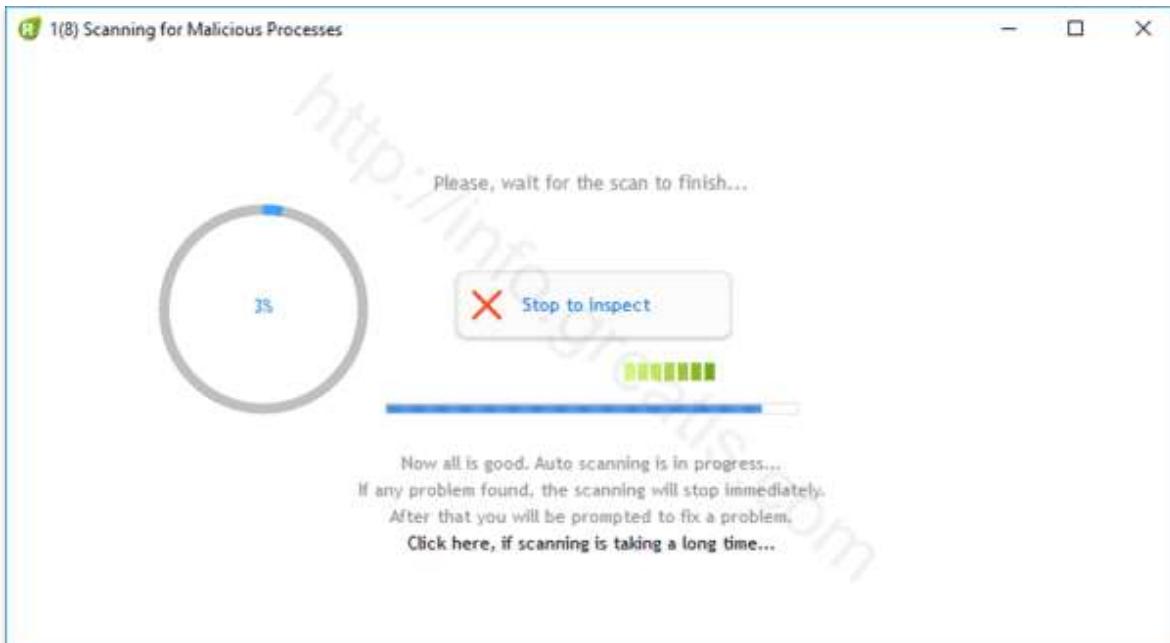

STEP 2: Scan for WWW2.SAVEMAX.STORE malware using UnHackMe (1 minute).

- After that you have to run [UnHackMe](#), and start scanning, you may use fast scan for only 1 minute. But if you have time - I recommend you to run Online Multi-Antivirus + Anti-malware scanning with VirusTotal - it will increase probability of detection not only WWW2.SAVEMAX.STORE virus, but the other unwanted software too.

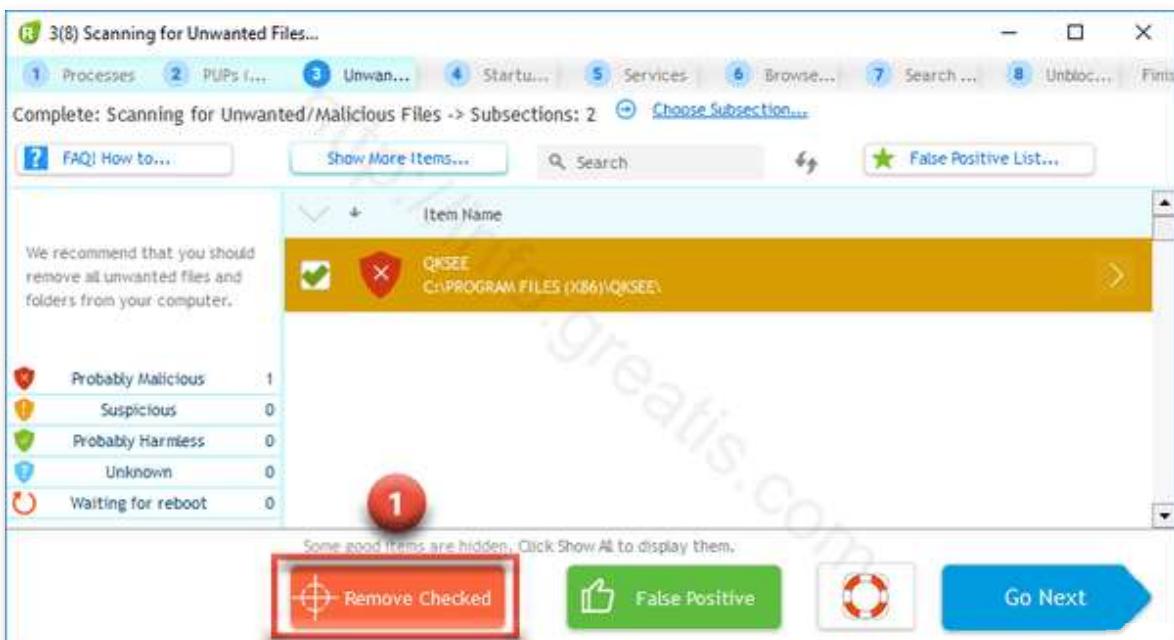

- After that the scanning process will begin.

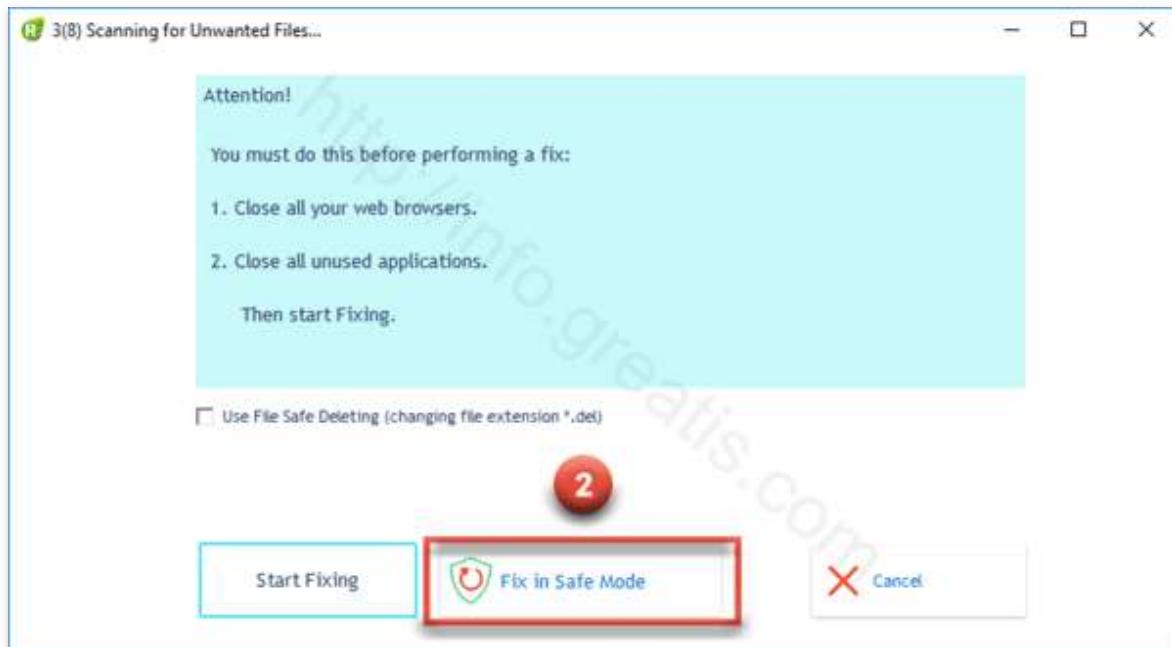

STEP 3: Remove WWW2.SAVEMAX.STORE malware (3 minutes).

1. By the way, [UnHackMe](#) shows you everything he found, not only absolutely bad, but suspected and even potentially good. Be careful! Not sure - skip it! But if it is marked as dangerous - trust it. It will be red. Check it and click Remove Checked.

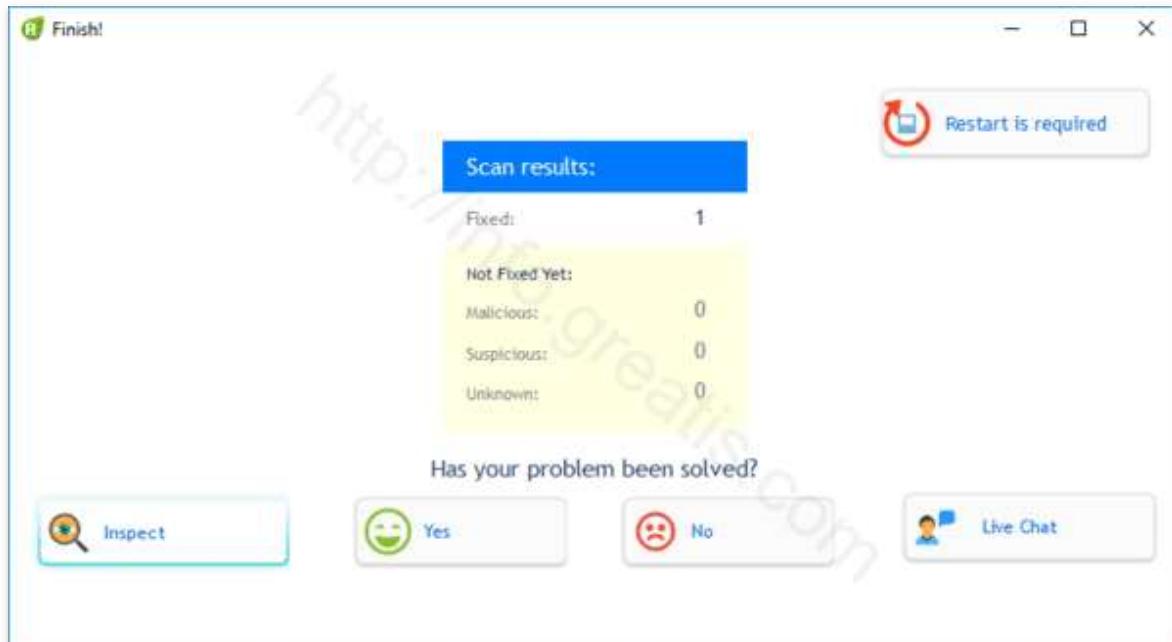

2. After that [UnHackMe](#) may ask you for confirmation and advise to close all browsers. Do it.

3. In case you need to delete file or directory it is better to check 'Use file safe deleting'. Yes, you will need to reboot, but this is best way.

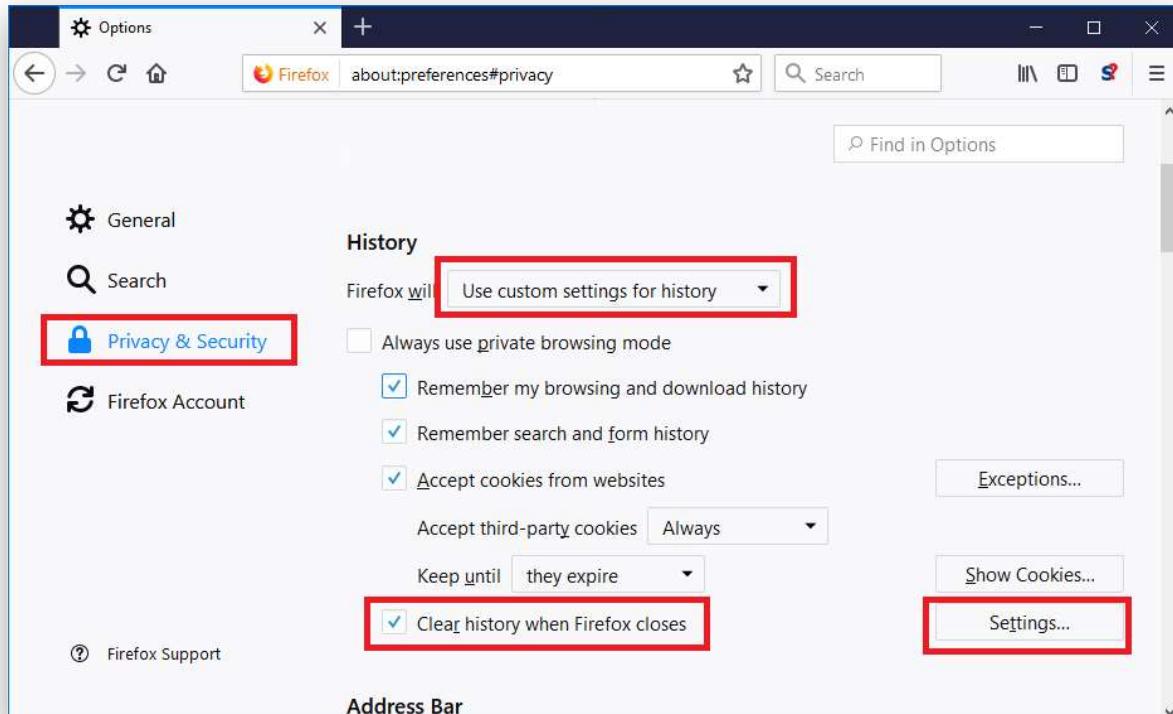

4. And after all you will see the results of your scanning and fixing process

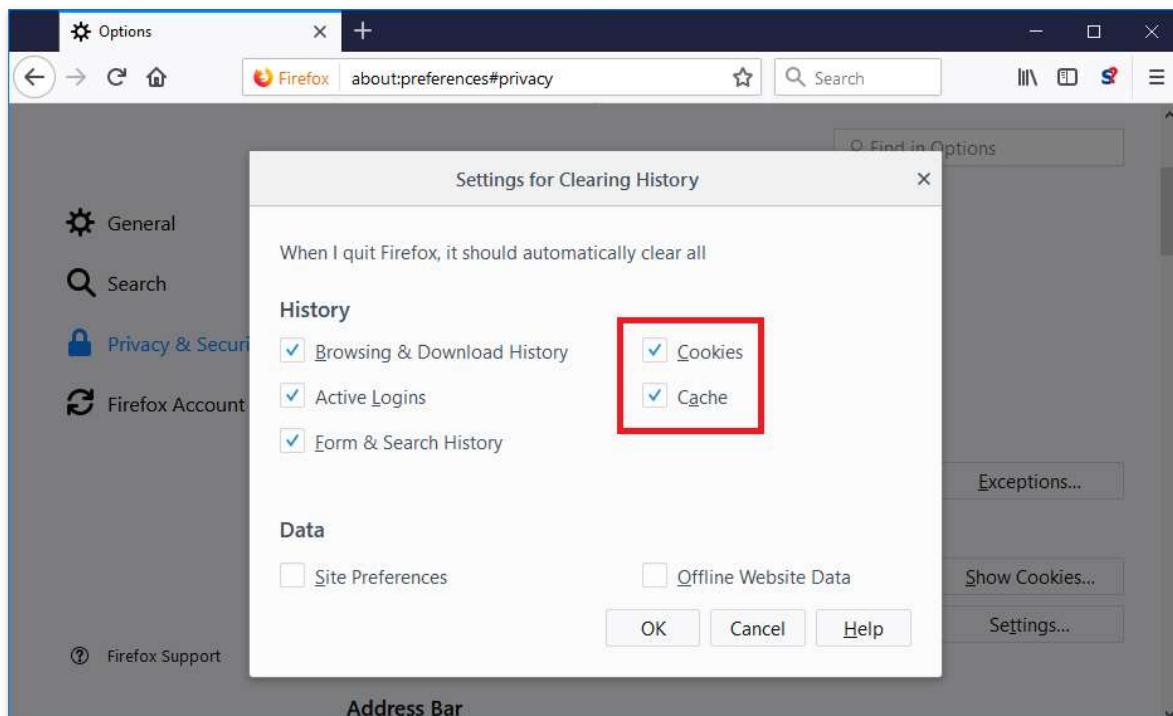

STEP 4: (optional) Clear your basket and cache.

- ✓ Well, at first clear your basket. It is very usual, but necessary operation. Simply right click on your basket and choose "Clear".

- ✓ After that you have to clear the cache of your browser. For example, if you use Mozilla Firefox as I do, just go to menu Tools and run Options. Open Privacy tab and check option 'Clear history when Firefox closes'.

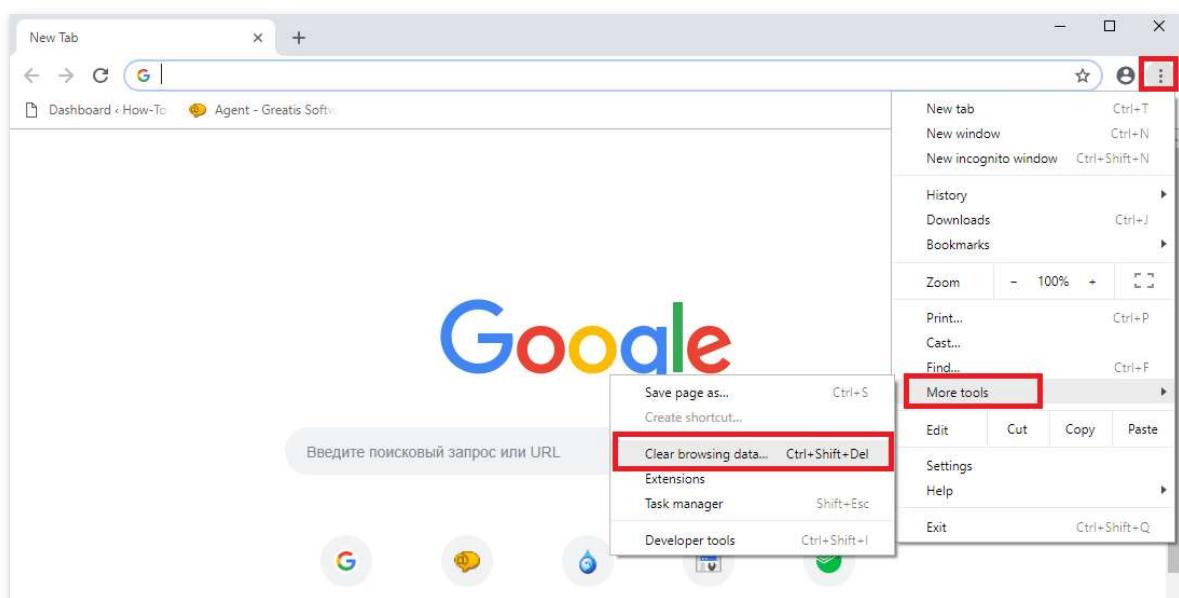

- ✓ Then click Settings at this screen and check options 'Cookies' and 'Cache' as shown at picture.

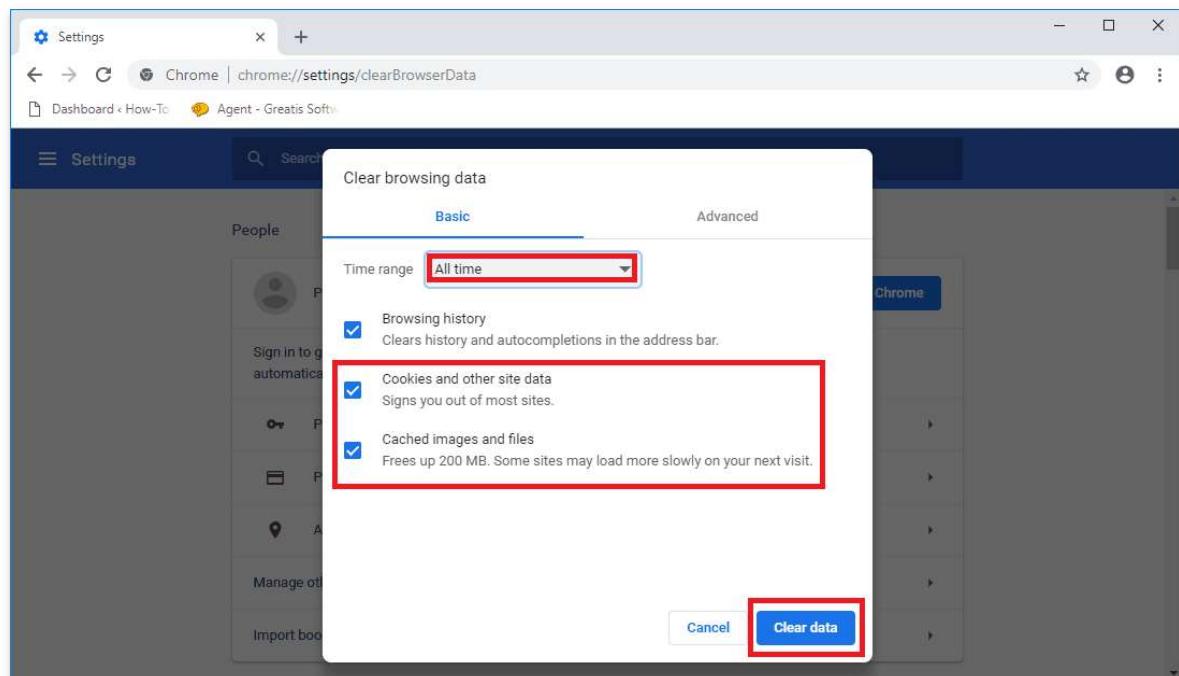

- ✓ After that click OK and close your browser's pages. All information in cache will be removed.

- ✓ If you prefer to use Google Chrome, just go to More menu (three dots at the right top), choose More tools and then Clear browsing data.

- ✓ At the top of the new appeared form, choose a time range. To delete everything, select All time. Check the boxes next to "Cookies and other site data" and "Cached images and files". Finally click Clear data.

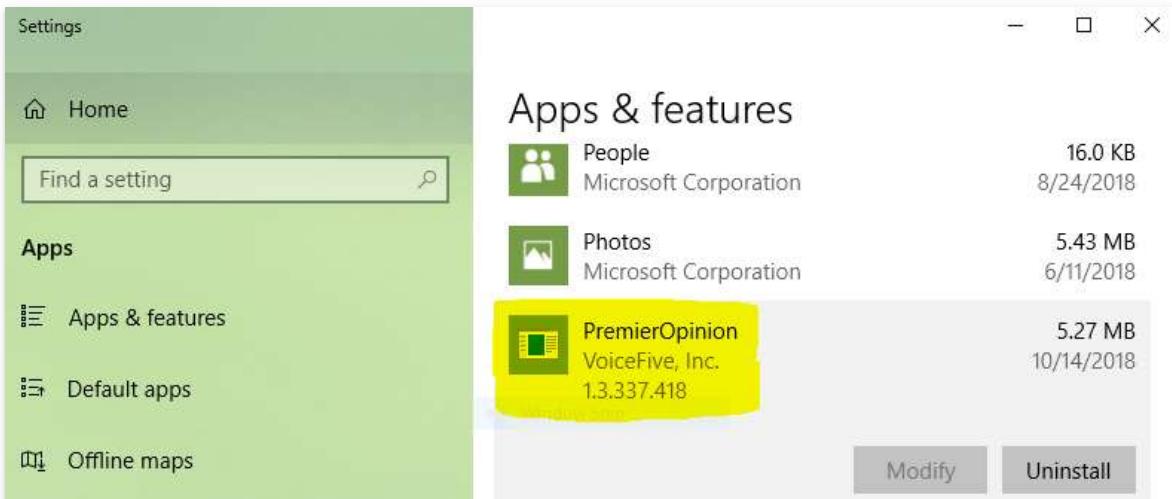

So after all these steps you will have absolutely clean system without any trace of WWW2.SAVEMAX.STORE virus. Start using [UnHackMe](#) right now to completely protect your PC from malware and unwanted programs!

How to remove WWW2.SAVEMAX.STORE

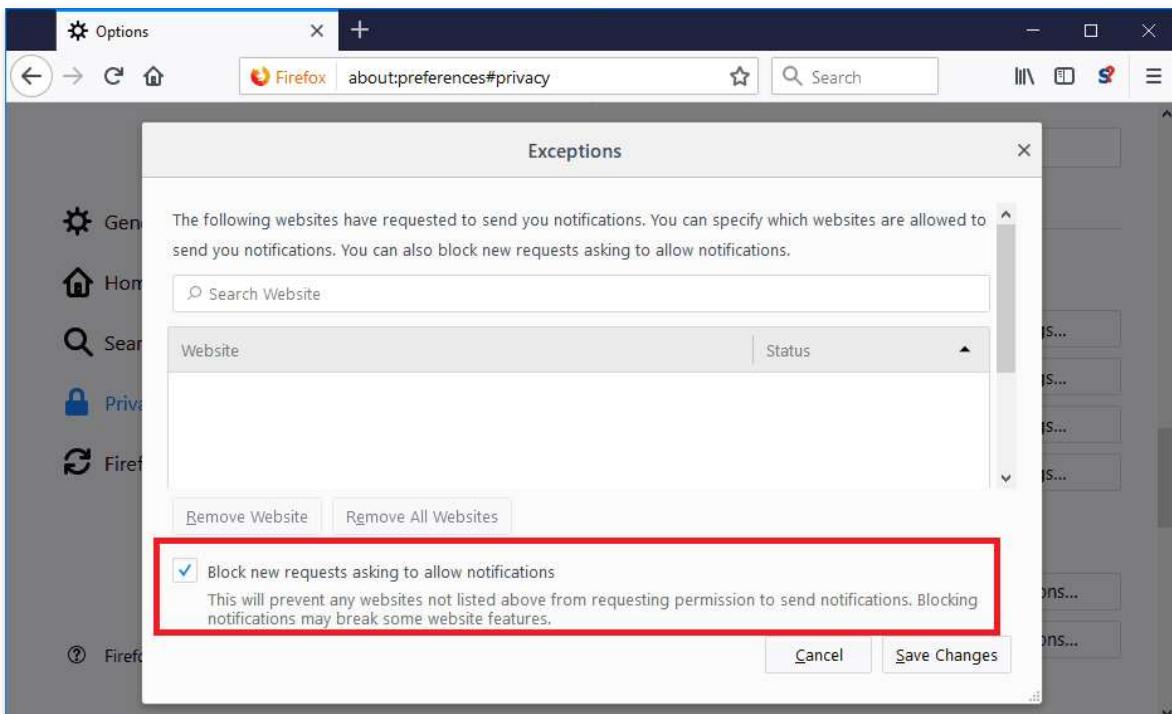

virus manually? (Virus removal guide)

1. Find WWW2.SAVEMAX.STORE in the list of installed programs and uninstall it.

[More info...](#)

2. Disable Notifications in your browser.

[More info...](#)

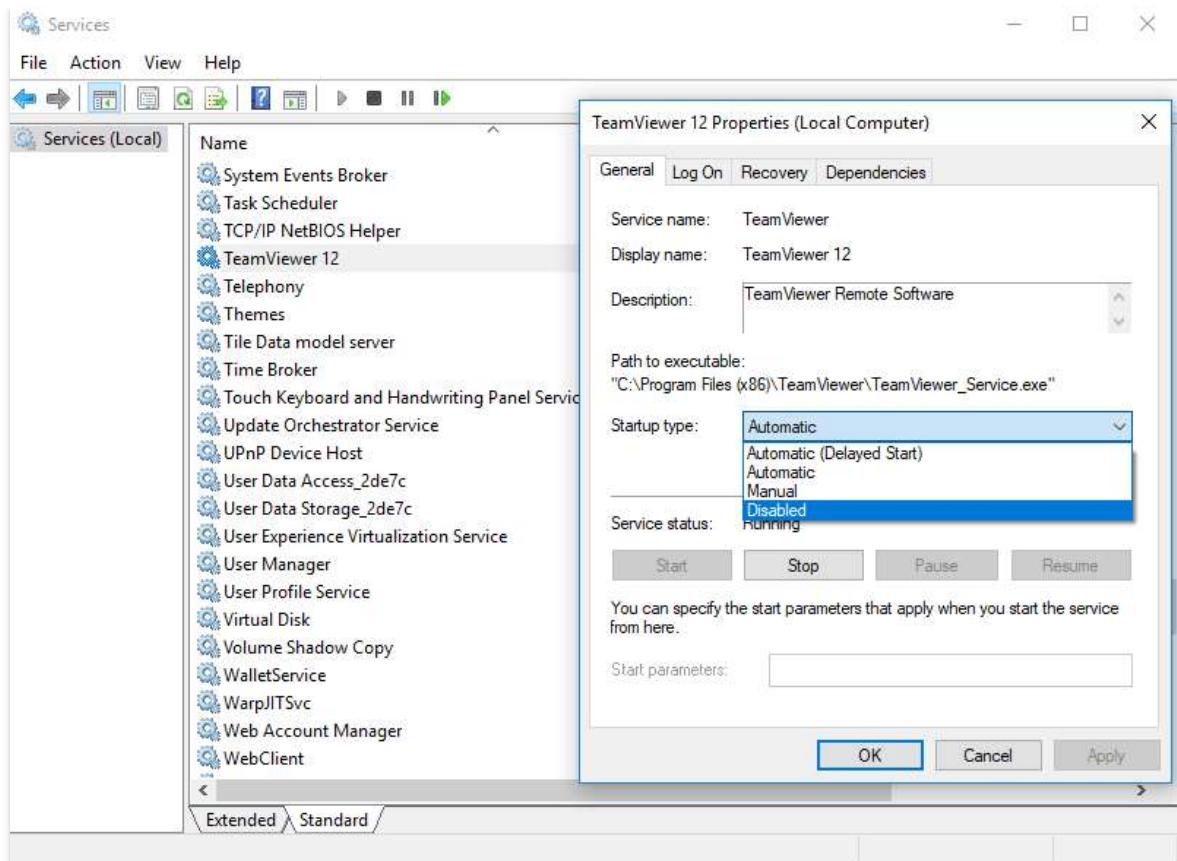

3. Open Task Manager and close all programs, which has name WWW2.SAVEMAX.STORE in their description. Check the directories where such programs start. Erase all of them too.

The screenshot shows the Windows Task Manager interface. The main window title is 'Task Manager'. The menu bar includes 'File', 'Options', and 'View'. Below the menu is a tab bar with 'Processes' selected, followed by 'Performance', 'App history', 'Startup', 'Users', 'Details', and 'Services'. The main content area displays a table of processes. The columns are: Name, CPU (100%), Memory (50%), Disk (4%), Network (0%), GPU (0%), and GPU Engine. The table is divided into sections: 'Apps (3)' and 'Background processes (31)'. In the 'Apps (3)' section, Google Chrome (9) is listed with 100% CPU usage, 131.3 MB memory, 1.9 MB/s disk, 0 Mbps network, and 0% GPU usage. Paint and Task Manager are also listed with 0% CPU usage. In the 'Background processes (31)' section, several system processes are listed, all with 0% CPU usage: Antimalware Service Executable, COM Surrogate, CTF Loader, Google Crash Handler, Google Crash Handler (32 bit), Google Installer (32 bit), Host Process for Windows Tasks, and igfxCUIService Module. The 'More info...' button is visible at the bottom left, and the 'End task' button is visible at the bottom right.

| Name | 100% CPU | 50% Memory | 4% Disk | 0% Network | 0% GPU | GPU Engin |
|-----------------------------------|----------|------------|----------|------------|--------|-----------|
| Apps (3) | | | | | | |
| > Google Chrome (9) | 100% | 131.3 MB | 1.9 MB/s | 0 Mbps | 0% | GPU 0 - |
| > Paint | 0% | 0.4 MB | 0 MB/s | 0 Mbps | 0% | |
| > Task Manager | 0% | 9.9 MB | 0 MB/s | 0 Mbps | 0% | |
| Background processes (31) | | | | | | |
| > Antimalware Service Executable | 0% | 5.1 MB | 0.1 MB/s | 0 Mbps | 0% | |
| COM Surrogate | 0% | 0.2 MB | 0 MB/s | 0 Mbps | 0% | |
| CTF Loader | 0% | 1.0 MB | 0 MB/s | 0 Mbps | 0% | |
| Google Crash Handler | 0% | 0 MB | 0 MB/s | 0 Mbps | 0% | |
| Google Crash Handler (32 bit) | 0% | 0.2 MB | 0 MB/s | 0 Mbps | 0% | |
| Google Installer (32 bit) | 0% | 0 MB | 0 MB/s | 0 Mbps | 0% | |
| Host Process for Windows Tasks | 0% | 0.4 MB | 0 MB/s | 0 Mbps | 0% | |
| > igfxCUIService Module | 0% | 0.1 MB | 0 MB/s | 0 Mbps | 0% | |

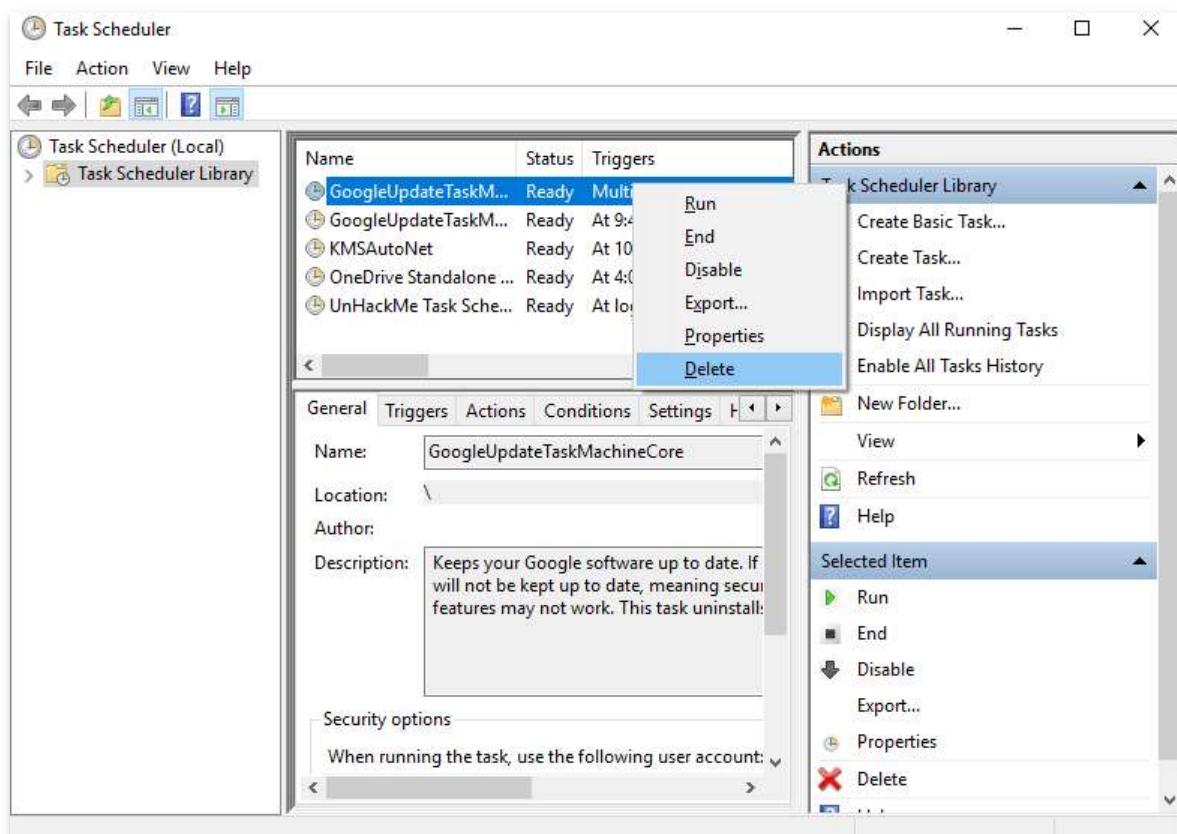

[More info...](#)

4. Disable auto starting of services with WWW2.SAVEMAX.STORE in it's name.

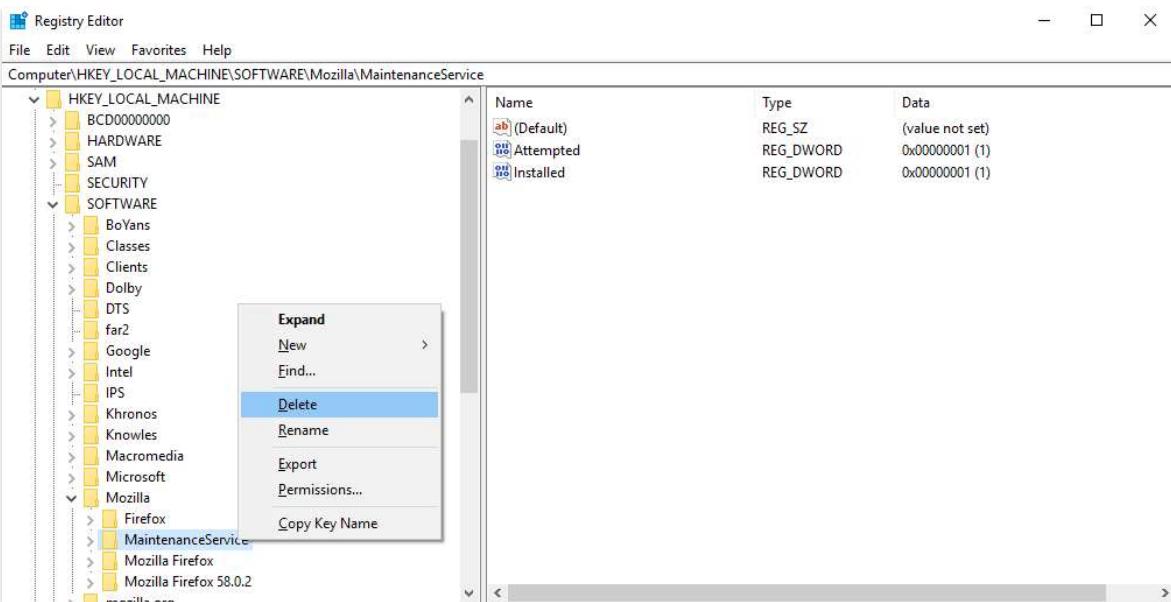

[More info...](#)

5. Delete tasks with WWW2.SAVEMAX.STORE in its name.

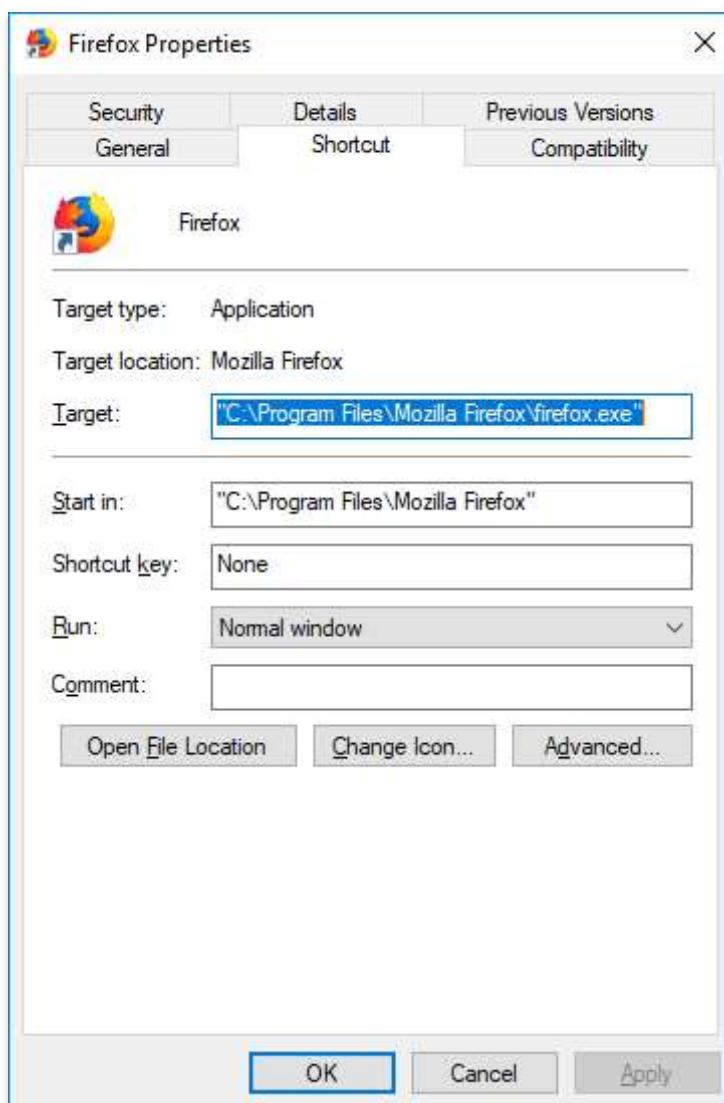

[More info...](#)

6. Find and delete all keys with virus name in its content.

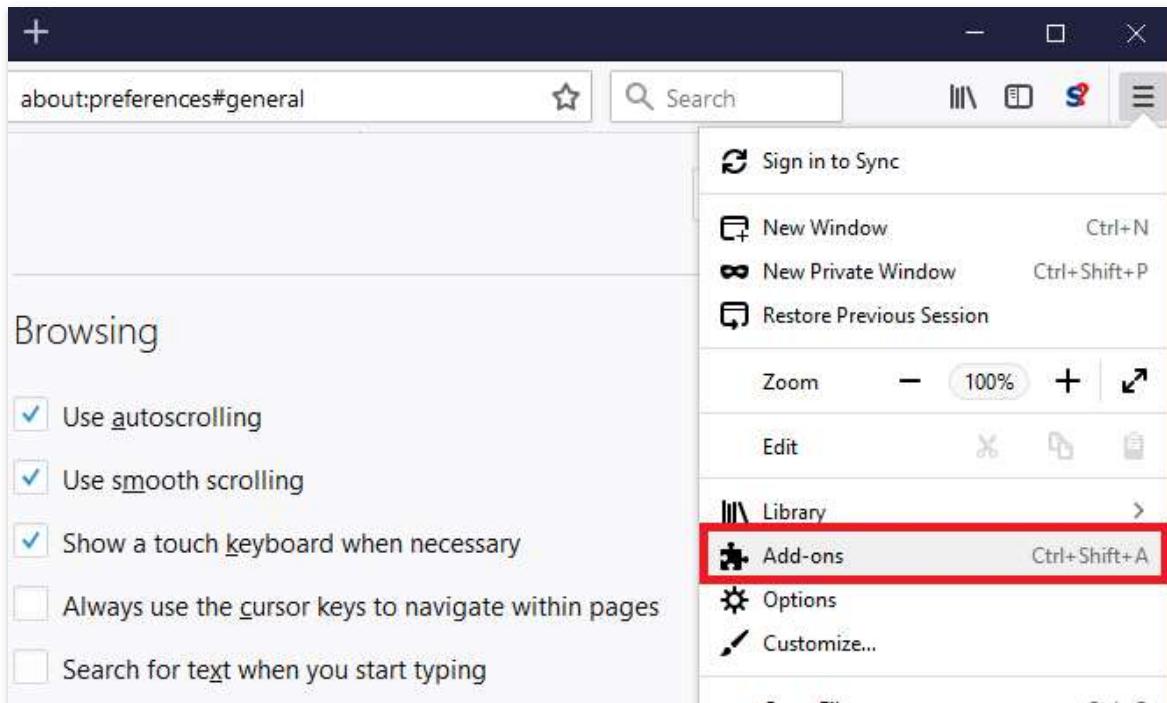

[More info...](#)

- After that, check shortcuts of your browsers if they have additional addresses at the end of command line. Check if shortcuts runs real browsers, not fakes. Remember: Chromium is fake browser, real name have to be Chrome.

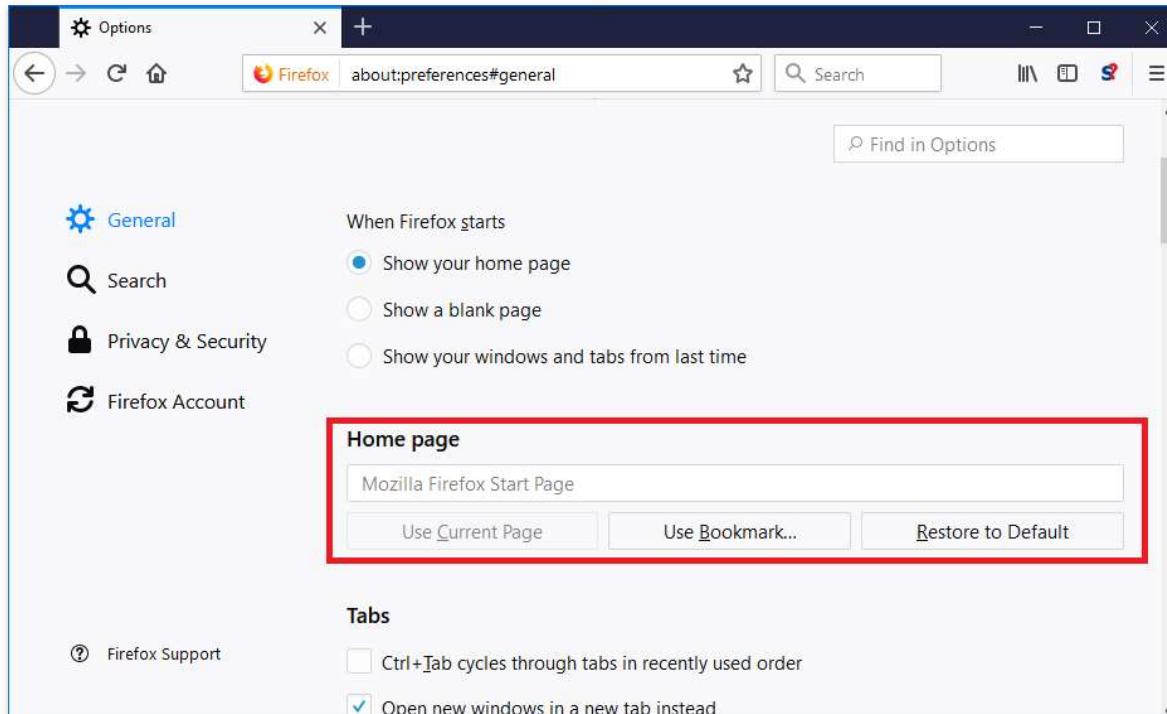

- Check all plug-ins of all installed browsers: Firefox, Internet Explorer, Chrome, etc., if they have our virus name in their names or directory. You may need to

uninstall suspicious extensions or totally reset your browser.

[More info for Mozilla Firefox...](#)

- After that, check settings of search and homepage of your browser. Reset them if needed.

- Next, you have to check your DNS settings. Follow your provider's instructions, delete all unknown DNS addresses.

[More info...](#)

- And at the end, clear your basket, temporal files, browser's cache.

But if you miss any of these steps and only one part of virus remains - it will come back again immediately or after reboot.

So it was much easier to fix such problem automatically, wasn't it? I fixed WWW2.SAVEMAX.STORE virus in only 5 minutes! That is why I strongly advise you to use [UnHackMe](#) for remove WWW2.SAVEMAX.STORE virus or other unwanted software, using this simple guide.
